

APPENDIX J

Summary of Toxicological results. Samples taken at autopsy of Henri Paul 31 August 1997 by Professor Lecomte.

SAMPLE	TESTED BY / ON	RESULTS. (<) = Less than. < LD=below detection limit.
1. Blood	<u>Prof. RICORDEL</u> 01/09/97 01/09/97	<u>Quantitative blood alcohol analysis</u> 1.8718g/l Ethanol 1.8750 g/l Ethanol <u>Conclusion reported.</u> 1.87 g/l Ethyl alcohol content.
2. Blood	<u>Dr PEPIN</u> 01/09/97 01/09/97	<u>Quantitative blood alcohol analysis</u> 1.74g/l Ethanol <u>Confirmation blood alcohol analysis</u> 1.72 g/l Ethanol <u>Conclusion reported.</u> 1.74 g/l Ethanol/ethyl alcohol [Paget Note: On 01/09/97 additional tests were carried out on this blood that detected the presence of:- Cotinine, Caffeine, Fluoxetine, Fluoxetine Metabolite]. The charts relating to these tests were included in report dated 09/09/97.
3. Blood	<u>Dr PEPIN</u> 04/09/97 04/09/97 04/09/97 09/97/97	<u>No quantitative blood alcohol analysis test on this sample</u> Qualitative presence of ethyl alcohol [Paget Note: Detected as a result of a standard search for volatile substances]. <u>Conclusion reported.</u> Presence of alcohol confirmed. Fluoxetine, Norfluoxetine, Tiapride <u>Carboxyhaemoglobin level</u> 20.7% 21% 21.4% <u>Conclusion reported.</u> Carboxyhaemoglobin level 20.7%. Nicotine, Cotinine, Fatty acids, cholesterol, caffeine.
Urine	<u>Dr PEPIN</u> 04/09/97 08/09/97 04/09/97	<u>Quantitative alcohol analysis</u> 2.18 g/l Ethanol <u>Confirmation analysis</u> Ethanol 2.18, 2.18956 g/l Fluoxetine Norfluoxetine, Tiapride.
Vitreous humour	<u>Dr PEPIN</u> 08/09/97	<u>Quantitative alcohol analysis</u> 1.73 g/l Ethanol. [Paget Note: Quantity of sample insufficient for medicines].
Stomach contents	<u>Dr PEPIN</u> 04/09/97 08/09/97 04/09/97 04/09/97	<u>Quantitative alcohol analysis</u> 1.91 g/l Ethanol <u>Confirmation analysis</u> 1.98165 g/l Ethanol 1.91 g/l <u>Quantitative drugs analysis</u> Fluoxetine, Norfluoxetine, Tiapride < 0.05 µg/g.
